UNPARALLELED IN DURABILITY AND PAYLOAD CAPACITY, HORTON'S 623 MEDIUM DUTY AMBULANCES PROVIDE MAXIMUM PERFORMANCE.

Crews facing hilly terrain or long treks to the hospital depend on Horton Medium Duty ambulances for their superior performance. Customize with a choice of pass-through or walk-through, crash barrier configuration and more.

At 173" in length, the model 623 body is Horton's largest standard available. Paired with a medium duty chassis, the 623 offers an emergency vehicle ready for any customization, with plenty of space and available payload.

INTERNATIONAL 4300

With the lowest available ambulance loading height, the International 4300 chassis is available as a 623.
